

MANN-FILTER HU 712 x – Possible fitment problem due to OE change to components of some Vauxhall oil filter housings.

Vauxhall (Opel) has changed components of some oil filter housing centre tubes which makes **HU 712 x** unsuitable for the following vehicles *if* equipped with the amended component:

Year of manufacture: 03/2006 – 10/2007 – up to engine number 19MA9234.

Agila 1.0 12V, 1.2 16V.
Astra G 1.2 16V
Astra H 1.4
Tigra 1.4
Corsa B 1.0 12V, 1.0 16V, 1.2 16V, 1.4 16V
Corsa D 1.0, 1.2, 1.4

This OE change involves a component of the oil filter housing centre tube / by-pass valve mechanism as illustrated below:

Former design
(HU 712 x compatible)

Amended design
(HU 712 x incompatible)

The difference in designs can easily be identified and difficulties fully closing the oil filter housing cap can be experienced when fitting HU 712 x with the amended design. However, as a precautionary measure, MANN+HUMMEL will no longer supply **HU 712 x**.

A new oil filter compatible with both former and amended centre tube designs will shortly be introduced as part number **HU 712/8 x**. This part number will replace **HU 712 x** completely.

We apologise for any inconvenience caused whilst achieving amended OE matching quality of this **MANN-FILTER** product.

Please note:

- **HU 712 x is fully compatible** with the former design.
- The correct oil filter for the above vehicles **from engine number 19MA9235 onwards**, is **HU 612/2 x** as currently catalogued by **MANN-FILTER**.
